Jackie,

Are you free to chat? We already contacted [REDACTED]

Angela

Subject: Cryogenic crumb samples

I realize this information is late in coming, but you asked about additional cryogenic samples. I spoke with Mary Sikora, my contact at the Scrap Tire New, who has been helpful before. It took her a week to get back to me, but here is what she found:

- [REDACTED] Ex. 3 [CERCLA section 104(e)(7)(42 USC 9604(e)(7))]] is willing to have sample takers visit his facility to gather fresh sample of cryogenically produced crumb rubber.

[REDACTED] can be reached at [REDACTED] Ex. 3 [CERCLA section 104(e)(7)(42 USC 9604(e)(7))]] He has my name, and he's awaiting a call.

- [REDACTED] Ex. 3 [CERCLA section 104(e)(7)(42 USC 9604(e)(7))]] plans to call me, but I am happy to let one of you follow up if you want. His company uses cryogenic processing to produce crumb rubber.

If you decide not to follow up on either, let me know so I can get back to them, thank them anyway, and close the loop. If you want me to do anything else with these 2 contacts, let me know.

- Mary is willing to work with us and her contacts to find facilities to do further sampling/testing if you want. Let me know.
